On behalf of Tantia University Journal of Homoeopathy and Medical Science. I am glad to present the Volume 3, Issue 2 of the journal. The journal established in October 2018 is now getting indexed by different academic forums. The aim of this journal is to meet the need for continuing medical education of the members, scholar and medical fraternity and to publish article of scientific excellence.

The whole world fight against Covid-19 was recognized in December 2019. In January 2020 the World Health Organization (WHO) declared the outbreak of a new coronavirus disease in Hubei Province, China to be a Public Health Emergency of International Concern. Covid-19 outbreak has posed critical challenges for the public health, research, and medical communities. A robust research effort is currently under way to develop a vaccine against Covid-19. Therapy currently consists of supportive care while a variety of investigational approaches are being explored. Till date more than 14 million people suffering from Covid-19 and 6 lakh death due to this. Every outbreak provides an opportunity to gain important information, some of which is associated with a limited window of opportunity. Still we are struggling from this disease there is no option for treatment in any medical stream. To debate which medical system is scientific or holistic might be only of academic interest. Every medical system has something to offer in health care. The public want a safe, effective and rational treatment. There is need of integrated approach of all system of medicine against COVID-19 pandemic.

We would like to thank all members of the Editorial Board, reviewers and all authors for support towards this journal.

Dr. Parveen Kumar

Director (Academic & Research)
