Abstract-
Acne is common human skin disease mostly found in adults during their teenage. Characterized by seborrhoea (red skin), comedones (blackheads), papules (pinheads), pustules (pimples), nodules, etc. Acne affects skin over face, the upper part of the chest, back where skin contains hair follicles, sebaceous glands. Mostly, acne is seen in adolescents because of increased testosterone levels or androgens. Homeopathy for acne is different from conventional treatment in that a homeopathic remedy is individualized to the person. Because every person is different, no single homeopathic remedy will work for everyone. A remedy is selected based on a person’s unique set of symptoms, including their acne symptoms.

Introduction-
Acne is the commonest kind of skin issue and nearly all people are suffering from them. Acne happens once small holes on the surface of the skin, known as pores, become clogged. Every pore is an opening to a canal known as a follicle that contains a hair and an exocrine gland known as oil gland. Normally, the oil glands facilitate keep the skin lubricated. Once the oily glands turn out an excessive amount of oil, the pores will become blocked, accumulating dirt, debris, and bacterium. The additional production of secretion is caused by the hormonal changes, resulting in increased activity in oil manufacturing Glands or greasy glands. Acne typically appears on face, neck, back and chest because of the abundance of oil gland units in these areas. Though acne may be a disorder related to teenagers or Young age or puberty however it will occur at any age of life. Acne, or acne vulgaris, may be a skin problem happens when the Hair Follicles become obstructed with oil and dead skin cells. Some individuals call it blackheads, blemishes, whiteheads, pimples.
Acne includes seborrhea (increased sebum secretion), comedones, papules, pustules. Scars are formed by inflammation of dermis caused by acne by deposition excessive collagen formation in process of healing the wound. Ice pick scars, car box scars, hypertrophied scars are various types of scars. cystic acne. Pigmented scars are the result of formation cystic acne. They often leave an inflamed red mark.

Globally, 650 million people are suffering from acne. 40 to 60 per people are suffering from acne. Females are more affected than males.

Homeopathy for acne is totally different from conventional treatment in this a homeopathic remedy is personalized to the person. As a result of everyone is totally different, no single homeopathic remedy can work for everybody. A remedy is chosen based on a person’s unique set of symptoms.
